Tips for setting up the Active Treasure Hunt

- The 1st clue is read out at the starting point.
- Depending on your indoor area, mix up the clues and place them in locations whereby the children have to walk/ run a good distance before reaching the next point.
- If you have plastic sheets/small sandwich bags/ laminating sheets, place each clue on one, so you can re-use them.
- If a few siblings are doing the hunt together, and some are older/ faster – set a rule that the group must stay together throughout the hunt, complete the exercises together, and figure out the next clue together, before moving on.
- Attach each clue with a little tape so they don't fall off.
- For older children, make the clues more cryptic, and use more difficult words so they can also improve literacy.
- You choose the 'Treasure' to be found at the last location. Although more often than not, the prize is sweet treats, other options could include:
 - They get to choose a movie to watch
 - Staying up a little bit later at bedtime
 - Extra playtime
 - Pick their favourite dinner for tomorrow
 - One day of 'jobs'
